

## Arena Simulation Software

See one of the most innovative releases of Arena ever. The new version, Arena 14.0, completely transforms simulation visualization with unprecedented lifelike animation that's driven by a powerful gaming engine. Learn how easy it is to create stunning, in-process 3D animation and develop live data dashboards in the new Visual Designer. Plus, a roadmap of Arena's exciting future will be presented.

Bring your Arena models to life with 3D animation.

Create custom data dashboards to display your Arena model's key performance measures.
