ABSTRACT

AutoMod's capability to model large complex automation and material handling systems continues to lead the market. Recent enhancements to AutoMod's material handling systems have increased modeling accuracy and ease-of-use. These advances have made AutoMod one of the most widely used simulation packages. AutoMod's power lies in its performance, scalability and accuracy in detailed modeling of large and complex manufacturing, distribution, automation and logistic operations, leaving the competition behind. Come see why the top material handling companies, high-tech companies, and systems integrators rely on AutoMod to deliver their results!!
